## Description

This is a range of premium fabrics for indoor and outdoor furniture. The hydrophobic technology applied works by impeding the liquids that permeate the fabric, forcing them to roll out of the fabric in the form of drops. The fabric protection that brings out the liquids allows for drops of water and oil to be eliminated during normal washing without leaving any traces. Solution-dyed acrylic; is dyed before thread is created. A liquid acrylic solution is mixed with dye and then formed into a fiber and spun on thread.

Composed of different 3 shades of unique colors.

Thermal welding in all stitching applied

Air circulate system

Water repellent

Laminated

Anti-mould

UV-Resistant

NFPA 260

CAL 117
