1/3

Miguel Milá designed this table in the mid-sixties as an altar for his wedding. It later became a table for everyday use, but was never produced.

As if he were a master craftsman, Miguel Milá designed this piece based on the heart of simplicity and efficiency. Its shape hides its complexity, but at the same time reveals the wood's own character, giving it life and prominence. Its constructive logic makes it strong enough in terms of structure, but formally a beautiful piece.

The beauty of logic and common sense understands neither time nor trend.

### Maintenance

---

#### Aluminium

Protect surfaces with barrier elements like film, paper, and peelable lacquers before placement and handling. If accidental contamination or splashing of strong alkalis or acids occurs, wash the affected area with a large amount of clean water, especially cut-outs or holes and cavities.

#### Teak

We recommend treating the wood with sealer every three months, or more frequently in the case of hotel and catering establishments. To restore the teak to its original appearance, sand the entire surface and apply the sealer.

#### Marble

Clean only with a soft cloth, warm water and pH neutral detergent. Do not use: acids, ammonia, abrasive powders, window cleaners and so on. Any substance with an acid pH will damage marble: lemon juice, wine, etc. Marble is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the marble with sealant every three months, more frequently in the case of hotel and catering establishments.
