## Marble Maintenance

---

Clean with non-corrosive, non-abrasive cleaners to ensure the longevity and pristine appearance of aluminium surfaces. Avoid the use of scrubs pads or pressure cleaners, as these may cause damage.

## Marble Maintenance

---

Clean only with a soft cloth, warm water and pH neutral detergent. Do not use: acids, ammonia, abrasive powders, window cleaners and so on. Any substance with an acid pH will damage marble: lemon juice, wine, etc. Marble is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the marble with sealant every three months, more frequently in the case of hotel and catering establishments.

## Finishes
