

Marble

**kettal**

Kettal Marble is light and strong, thanks to its technical structure, a combination of marble, aluminium honeycomb and fibreglass. It is a natural matte carbonate stone from the metamorphosed limestone family that is outstanding for its compact texture and fine crystalline structure. This marble is highly resistant to impact, is of reduced thickness, which makes cleaning easier.

kettal

As this material is made using a semi-handcrafted process, the following characteristics may occur:

Pitted texture

Colour

Joints

## Cleaning & maintenance

Clean only with a soft cloth, warm water and pH neutral detergent. Do not use: acids, ammonia, abrasive powders, window cleaners and so on. Any substance with an acid pH will damage marble: lemon juice, wine, etc. Marble is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the marble with sealant every three months, more frequently in the case of hotel and catering establishments.
