After installation, reset the desk according to the operating instruccions.

Hold the down button for 5 seconds or until the desk reaches its lowest height. Then there will be a small rebound movement. If the desk didn't move, try this step again.

Try operating the desk. If the desk is working properly, you're done!

Space to install:
Sprinkler
Smoke detector
Speakers

Kall cabins are easily transportable so they can be considered mobile furniture
rather than building structures for which building sprinkler standards are established.
In addition, they are manufactured from fireproof or retardant materials that do not
contribute to increased fire loads.
Kettal does not provide, does not install and is not responsible for the installation of
this type of accessories. However, if local regulations require it, it is possible to install them.
